In 2020, the South Tangipahoa Parish Port Commission/Port Manchac will continue the re-development of the facility through the continuation of a series of infrastructure projects engineered to provide safe & efficient cargo storage and trans-loading operations by barge, rail, and truck at the inter-modal terminal. The completion of the \$3 million investment program will include internal roadway, drainage, parking improvements, rail spur maintenance, lay-down storage area improvements, and bulk-head/harbor dredging improvements at the facility. An additional infrastructure funding grant from the LA Department of Transportation & Development will also commence later this year to expand on the current series of improvement projects. The new infrastructure is part of the port's master plan for future development that was originally developed in 2007 and updated in 2017 to attract new industries and create new quality job opportunities for residents of the Tangipahoa Parish area.

The 140-acre inter-modal terminal is located adjacent to Interstate Highway-55 at the southern end of Tangipahoa Parish. Port Manchac is also adjacent to the mainline of the Canadian National Railroad (CN) that provides regular service to the 6'000 ft. of storage track at the site. The terminal's ideal location also provides direct trucking links to nearby Interstate's 10 & 12, and offers access for barge shipments to Lake Pontchartrain, Mississippi River and The Port of New Orleans via North Pass. Additional infrastructure and logistical info on the Port Manchac inter-modal terminal is available @ www.portmanchac.com.
